

AMENDMENTS TO THE SPECIFICATION

Please replace the Brief Description of the Drawings section on page 3, lines 19- with the following section:

While the specification concludes with claims which particularly point out and distinctly claim the invention, it is believed the present invention will be better understood from the following description of preferred embodiments taken in conjunction with the accompanying drawings, in which like reference numerals identify identical elements and in which:

Fig. 1 illustrates a front elevation of a preferred embodiment of the present invention.

Fig. 2 illustrates a side elevation of the embodiment of figure 1.

Fig. 3 illustrates an angled perspective view of the embodiment of figure 1.

Fig. 4 illustrates a top elevation of the embodiment of figure 1.

Fig. 5 illustrates a bottom elevation of the embodiment of figure 1.

Fig. 6 illustrates a schematic cross section of the embodiment of figure 1.

Please replace the Example 1 section on page 8, lines 21-30 with the following section:

With reference to figures 1 to 4, a fluid dispenser comprising an anti-fogging mirror (1) is presented. The anti-fogging mirror (1) comprises a piece of reflective plastic with an area of 9 cm<sup>2</sup> that is coated with a hydrophilic nanoclay. The mirror is glued to the fluid dispenser. The dispenser is moulded from polypropylene and has approximate dimensions of 12 cm along the longitudinal axis, 4 cm in width and 2 cm in depth. The fluid is contained within the fluid container (2) and is dispensed through the dispensing orifice (3). The dispensing of the fluid through the dispensing orifice (3) is effected and controlled by the push button (4). A razor (5) is presented attached to the fluid dispenser via the razor clasp (6). Once the razor is removed for use, the anti-fogging mirror (1) is unobstructed. A suction cup (7) for attaching the fluid dispenser to a surface is provided. Sliding grooves (8) provide a means for releasably attaching the mirror to the dispenser. With reference to figure 6, (1A) indicates a curved anti-fogging mirror.
